

CLAIMS

We claim:

1. (original) A dual ended container comprising a sleeve that has a first end and a second end, each of said ends being adapted to receive a receptacle for containing a product and wherein the product in the first receptacle is different from the product in the second receptacle and at least one of the receptacles has a rollerball applicator for dispensing product from that receptacle.

2. (original) The dual ended container of claim 1 wherein the sleeve has a first section and a second section which are connected by a sidewall, said first section and the second section being opened at each of said ends and threaded so that they are adapted to receive a threaded end of a receptacle which contains a product.

3. (original) The dual ended container of claim 1 wherein the sleeve has a first section and a second section which are connected by a sidewall, said first section and the second section being opened at each of said ends and being adapted to receive an opened end of a receptacle which contains a product.

4. (original) The dual ended container of claim 3 wherein the sleeve and the receptacles have a cross

section of the same shape.

5. (original) The dual ended container according to claim 4 wherein the first section and the second section each have a conventional threaded cap inserted in the sleeve such that the caps are in a head to head relationship.

6. (original) The dual ended container according to claim 4 wherein the center axis of each end section is the same.

7. (original) The dual ended container according to claim 6 wherein the center axis of the sleeve and each of the receptacles are the same.

8. (currently amended) The dual ended container according to claim 1 wherein the receptacle having [[a]] the rollerball applicator contains a product containing a fragrance and the other receptacle has a doe foot applicator for applying an eye product contained in said receptacle.

9. (original) The dual ended container according to claim 8 where the product containing a fragrance is a perfume.

10. (original) The dual ended container according to claim 9 wherein the eye product is an eye liner.

11. (currently amended) The dual ended container according to claim 1 wherein the receptacle having [[a]] the rollerball applicator contains a product containing a fragrance and the other receptacle has an applicator for applying an facial product contained in said receptacle.

12. (original) The dual ended container according to claim 11 where the product containing a fragrance is a perfume.

13. (original) The dual ended container according to claim 12 wherein the facial product is a powder.

14. (original) The dual ended container according to claim 12 wherein the facial product is a cream.

15. (original) The dual ended container according to claim 12 wherein said facial product is a concealer.

16. (original) The dual ended container according to claim 12 wherein said facial product is a blemish control material.

17. (currently amended) The dual ended container according to claim 1 wherein the receptacle having [[a]] the rollerball applicator contains a product containing a fragrance and the other receptacle has an applicator for applying an nail product contained in said receptacle.

18. (original) The dual ended container according to claim 17 where the product containing a fragrance is a perfume.

19. (original) The dual ended container according to claim 18 wherein the nail product is a nail polish.

20 (original) The dual ended container according to claim 18 wherein the nail product is a hardener.

21. (currently amended) The dual ended container according to claim 1 wherein the receptacle having [[a]] the rollerball applicator contains a facial product contained in said receptacle.

22. (original) The dual ended container according to claim 21 wherein the facial product is a powder.

23. (original) The dual ended container according to claim 21 wherein the facial product is a cream.

24. (original) The dual ended container according to claim 21 wherein said facial product is a concealer.

25. (original) The dual ended container according to claim 21 wherein said facial product is a blemish control material.

26. (currently amended) The dual ended container according to claim 1 wherein the receptacle having

[[a]] the rollerball applicator contains a cosmetic serum.

27. (original) The dual ended container according to claim 21 wherein the second receptacle contains nail product and an applicator for applying said nail product.

28. (original) The dual ended container according to claim 27 wherein the applicator is a brush.

29. (original) The dual ended container according to claim 21 wherein the second receptacle contains an eye product and an applicator for applying said eye product.

30. (original) The dual ended container according to claim 29 wherein said applicator is a mascara brush.

31. (original) The dual ended container according to claim 29 wherein said applicator is a doe foot applicator.

32. (original) The dual ended container according to claim 29 wherein said applicator is a rollerball.

33. (original) The dual ended container according to claim 11 wherein said second receptacle containing a facial product has a rollerball applicator.

34. (original) The dual cosmetic container according to claim 1 wherein both of the receptacles have rollerball applicators and contain products containing a fragrance.

35. (original) The dual cosmetic container according to claim 1 wherein both of the receptacles have rollerball applicators and both receptacles contain facial products.

36. (currently amended) The dual ended container according to claim 1 wherein the receptacle having ~~[[a]]~~ the rollerball applicator contains a first lip product and the other receptacle has a rollerball applicator for applying a second lip product contained in said receptacle.

37. (currently amended) The dual ended container according to claim 1 wherein the receptacle having ~~[[a]]~~ the rollerball applicator contains a lip product and the other receptacle has a rollerball applicator for applying a facial product contained in said receptacle.

38. (currently amended) The dual ended container according to claim 1 wherein the receptacle having ~~[[a]]~~ the rollerball applicator contains a lip product and the other receptacle has a rollerball applicator for applying a product having a fragrance contained in said receptacle.

39. (currently amended) The dual ended container according to claim 1 wherein the receptacle having ~~[[a]]~~ the rollerball applicator contains a lip product and the other receptacle has a rollerball applicator for applying an eye product.

40. (currently amended) The dual ended container according to claim 1 wherein the receptacle having [[a]] the rollerball applicator contains a lip product and the other receptacle has an applicator for applying an eye product.

41. (currently amended) The dual ended container according to claim 1 wherein the receptacle having [[a]] the rollerball applicator contains a lip product and the other receptacle has an applicator for applying a nail product.

42. (new) A dual ended container comprising a sleeve that has a first end and a second end, each of said ends being adapted to receive a receptacle for containing a product and wherein the product in the first receptacle is different from the product in the second receptacle and only one of the receptacles has a rollerball applicator for dispensing product from that receptacle.

43. (new) The dual cosmetic container according to claim 42 wherein both receptacles contain facial products.

44. (new) The dual ended container according to claim 42 wherein the receptacle having the rollerball applicator contains a first lip product and the other receptacle has a second lip product contained in said receptacle.

45. (new) The dual ended container according to claim 42 wherein the receptacle having the rollerball

applicator contains a lip product and the other receptacle has a facial product contained in said receptacle.

46. (new) The dual ended container according to claim 42 wherein the receptacle having the rollerball applicator contains a lip product and the other receptacle has a product having a fragrance contained in said receptacle.

47. (new) The dual ended container according to claim 42 wherein the receptacle having the rollerball applicator contains a lip product and the other receptacle has an eye product.

48. (new) The dual ended container according to claim 42 wherein the cross section of the receptacle having a rollerball is the same as the cross section of the other applicator receptacle.

49. (new) The dual ended container according to claim 48 wherein the cross section of the receptacles is round.

50. (new) The dual ended container according to claim 49 wherein the diameter of the cross section of the receptacles is the same.

AMENDMENTS

The applicant amends paragraph [0001] to read as follows:

“The present application is a continuation-in-part of our co-pending application Appl. No. 09/291,670, filed April 14, 1999, the disclosures of which are incorporated herein by reference.”

The applicant amends paragraph [0027] to read as follows:

“Figure 4 shows the container of Figure 5 with the components separated.

The applicant amends paragraph [0043] to read as follows:

“ In another embodiment, the rollerball receptacle 22 may contain a liquid lip product, lip stain, lip gloss or other lip product. The other receptacle 25 may contain the same or a different type of lip product such as a clear or colored lip gloss, lip stain, liquid lip, etc., that may be applied with a doe foot applicator or another rollerball applicator. Similarly, the rollerball receptacle 22 may contain a clear lip gloss and the other receptacle 25 may contain a lip stain that may be applied with a doe foot applicator 27. In still another embodiment the rollerball applicator ~~[[25]]~~ 22 may contain a facial product such as a blemish control material and the other receptacle 25 may contain the same or different facial product such as a concealer. In a further embodiment the rollerball applicator ~~[[25]]~~ 22 may contain a facial product such as a concealer and the other receptacle 25 may contain the same or different facial product such as a blemish control material. ”
